

APPENDIX:

The Appendix includes the following item(s):

- ☒ - a new or amended Abstract of the Disclosure
- ☐ - a Replacement Sheet for Figure of the drawings
- ☐ - a Substitute Specification and a marked-up copy of the originally-filed specification
- ☐ - a terminal disclaimer
- ☐ - a 37 CFR 1.132 Declaration
- ☐ - a Substitute Specification and a marked-up copy of the originally-filed specification
- ☐ - a verified English translation of foreign priority document

ABSTRACT OF THE DISCLOSURE

A centering device provided with cleaning elements for cleaning a movable centering rod, and for preventing infiltration of dirt. The cleaning elements comprise at least one annularly-shaped scraping member provided with angularly spaced apart cross-cuts, which divide the scraping member into circular sections having inner scraping edges. The scraping member is locked against a conical shoulder in such a way as to be elastically yieldable, making the inner scraping edges of the sections adhere to the centering rod.

ABSTRACT

A device adapted for positioning, holding or gripping pieces, particularly of automobile body work sheet metal, comprises a mechanism movable at least partially in translation and an electrical actuating means (2, 32). The mechanism and the electrical actuating means (2, 32) are mounted head to tail, so as to reduce the size of the body (1, 31) of the device
